CAROL PIÑEROS TRUJILLO

Junior Full Stack Java Developer | Spring Boot · PostgreSQL · JavaScript

+57 3057373118 | carolpy25m@gmail.com | LinkedIn | GitHub | Portfolio | Bogotá, Colombia

PROFESSIONAL SUMMARY

Junior Full Stack Developer and mechanical engineer who builds projects end to end: REST APIs in Java and Spring Boot with PostgreSQL, JWT authentication, and responsive web interfaces in JavaScript, HTML, CSS, and Bootstrap. Experience in industrial environments brings strong analytical skills for optimizing complex processes and building efficient software. I combine an engineering mindset, initiative, and continuous learning to solve problems and deliver reliable, efficient solutions.

EDUCATION

Generation Colombia, Bogotá **September 2026**
Full Stack Java Program

Universidad Distrital Francisco José de Caldas, Bogotá **November 2023**
Mechanical Engineering

SELECTED PROJECTS

Agenda Pets | Pet Grooming Booking Platform **July 2026 – October 2026**
Full Stack Developer, 5-person team (Scrum) View demo | View on GitHub

- Collaborated in an agile team of 5 developers to build the REST API that orchestrates the entire booking flow, implementing JWT authentication and authorization with role-based access control.
- Implemented the booking drafts feature end to end, integrating server-side logic (Spring Boot/PostgreSQL) with the JavaScript frontend.

Web Tool for Designing Distributed Generation Plants Using Residual Biomass **2023 · updated 2026**
Author | Python · Django · PostgreSQL/SQL · deployed on Render View app | View on GitHub | Degree thesis

- Developed an application that assesses feasibility by region (Pacific, Amazon, Orinoquía), the energy potential of residual biomass (agricultural, livestock, and solid waste), and the demand of a consumption center, and recommends the technology pathway (thermochemical, biochemical, or hybrid), the specific technology, and the number of plants.
- Implemented case-based decision logic with 10 automated tests and deployed it to production with documentation and a technical bibliography.

Coworking API | REST API for Space Management **September 2026**
Backend Developer View on GitHub

- Developed a REST API in Java and Spring Boot with CRUD operations to manage locations and workspaces, ensuring data integrity and exception handling on PostgreSQL.

WORK EXPERIENCE

Empresa de Acueducto y Alcantarillado de Bogotá (EAAB) **May 2021 – December 2025**
Maintenance Planning and Control

- Managed maintenance work orders in SAP PM for more than 80 pumping stations, 3 hydroelectric plants, and water supply facilities, with response times under 24 hours.
- Analyzed maintenance KPIs and built Excel and Power BI reports to support data-driven decisions.
- Coordinated electrical, electronic, and mechanical teams with weekly follow-up, achieving 95% compliance with the annual plan.

SKILLS

- **Backend:** Java, Spring Boot, REST APIs, JWT, Object-Oriented Programming (OOP)
- **Databases:** PostgreSQL, MySQL, SQL
- **Frontend:** JavaScript, HTML5, CSS3, Bootstrap
- **Tools:** Git, GitHub, Postman, IntelliJ IDEA, Power BI, Excel, Scrum
- **Basic knowledge:** Docker, MongoDB, Python

ADDITIONAL TRAINING

- Databases with MySQL – SENA (2026)
- ISO 50001 Internal Auditor – SGS Academy (2025)
- Diploma in Renewable Energy Management – Politécnico de Colombia (2025)
- Software Development and Mobile Apps (800 h) – Universidad del Bosque and MinTIC (2021)
